

The Leicester Friends of the OCHS presents

Quantum Physics and Hinduism

Sachin Nandha of
The WeComeOne Group

Hinduism has always explored and identified with the subtlety of the universe, and ultimately our own nature. Hindu thinkers have never been convinced of a clock-like mechanical universe, and therefore all that is in it, including human beings. Western science through the “enlightenment” has always looked to mechanise the universe, and human beings with it. Only recently, in the last century did physicist begin to explore Quantum levels of our existence to discover the beauty and subtlety of everything around us.

I want show how recent discoveries in Quantum Physics strengthens the idea of a Spiritual Universe.

The Oxford Centre for Hindu Studies is an institute for the study of Hindu culture, religion, languages, literature, philosophy, history, arts, and society, in all periods and parts of the world.

Saturday 27th August 2011

**Jalaram Community Centre,
Narborough Road,
Leicester LE3 0LF**

**7.00pm to 9.00pm
followed by refreshments**

Email: lf@ochs.org.uk
